## Pediatric Care

Simulation manikins gives you the opportunity to practice and make mistakes without effecting patient care.

Children involved in an emergency medical situation deeply touch the hearts of all. The goal of the Emergency Medical Services for Children (EMSC) Program is to reduce the severity of illness and injury in the children of Nebraska.

## Objectives for PETS Course

This course emphasizes management of care in the pediatric population using a case-based teaching method. The class will be customized for the Agency/Hospital/Emergency Department in which this course will be presented.

Objectives include:

1. Identify reasons for deterioration in the pediatric population related to medical and trauma issues.
2. Discuss normal parameters of the pediatric population (Growth and Development, Vital signs)
3. Illustrate the use of equipment utilized in code/trauma situations.
4. Demonstrate the proper assessment and care of a pediatric patient using the case-based scenarios.
5. Describe other resources available to help with the management of Pediatric Patients. (EMS involvement, neighboring hospitals, State of NE., Tele-Health)

Feel confident treating pediatric patients.
